4. *Fine Arts.*

IV. MILITARY SCHOOL.

V. MEDICAL SCHOOL.

VI. SCHOOL OF COMMERCE.

VII. SCHOOL OF PHARMACY.

CALENDAR.

First Term, 1907-1908.

September 10, Tuesday—Enrollment.
September 11, Wednesday, 8:40 a. m.—Opening Chapel Service.
October 1, Tuesday, 9:00 a. m.—Opening Exercise of College of Medicine.
November 8, Friday—First Half Term ends.
December 20, Friday, 4:00 p. m.—Christmas Recess begins.
January 7, Tuesday, 8:40 a. m.—Christmas Recess ends.
January 24, Friday—First Term ends.

Second Term, 1908.

January 27, Monday—Enrollment.
January 28, Tuesday, 8:40 a. m.—Opening Chapel Service.
January 30, Thursday.—Day of Prayer for Colleges.
March 27, Friday—Second Half-Term ends.
May 7, Thursday—Graduating Exercises of College of Medicine.
May 15, Friday—Graduating Exercises of Business College.
May 24, Sunday, 11:00 a. m.—Baccalaureate Sermon.
8:00 p. m.—Annual Sermon before the Christian Associations.
May 25, Monday, 8:00 p. m.—Recital of Departments of Music and Oratory.
May 26, Tuesday, 8:00 p. m.—Joint Open Session of the Literary Societies.
May 27, Wednesday, 3:00 p. m.—Annual Meeting of the Board of Trustees.
8:00 p. m.—Graduating Exercises of the Academy.
May 28, Thursday, 10:00 a. m.—Competitive Drill.
2:00 p. m.—Field Day Exercises.
8:00 p. m.—Twenty-sixth Annual Commencement.
10:00 p.m.—President's Reception.

Rev. E. R. Houck.

New Mexico Mission.

Rev. Samuel Blair, Rev. J. E. Geisenger.

Historical

Fort Worth University was chartered as the Texas Wesleyan College, June 6, 1881, under the laws of the State of Texas, and authorized to maintain the usual curicula and departments of a college, and to confer the corresponding degrees. The school was opened in temporary quarters in the midst of the City of Fort Worth, September 7, 1881. After five years of preparatory work, it was moved to its present Campus in the south part of the city, where generous friends had erected for its occupancy a commodious and substantial building of brick and stone.

At the annual meeting held in June, 1889, the Board of Trustees secured an amended charter, under the name of Fort Worth University, it being the intention of the founders to ultimately establish a school in this center of the Southwest, where any person could find instruction in any study, and pursue it as far and as long as he chooses.

The School of Law was organized under the new charter in August, 1893, and its first class met for work September 26th following.

The School of Medicine was organized under the University charter in July, 1894, and began work in the succeeding October, in temporary quarters provided for it on the Campus. In 1896 the Medical Faculty became possessed of a fine building at the corner of Rusk and Seventh Streets. This was put in order and equipped for the Medical School, which resumed work in its new quarters September 30, 1896.

The Institution belongs to the University Senate, and has courses which lead in the Arts and Sciences to A.B., B.S., Ph.B., B.Litt.; in professional courses, four years in Medicine, leading to M.D. Her course in Oratory occupies three years, and in Music her course may be pursued for three years. Her Academic School has a four years' course, and admits to the Freshman year in the finest institutions in the country. Special courses are also arranged and provided for in Modern Language, Science and Pedagogy.

COLLEGE OF LIBERAL ARTS AND SCIENCES.

FACULTY.

WILLIAM FIELDER, D.D.,
President of the University.
ALICE C. CONKLING,
Professor of English.
JENETTE LEWIS, A.M.,
Professor of History.
GUY C. FRARY, B.S.,
Professor of Science.
MURREY KERR MARTIN, A.M.,
Professor of Greek and Latin.
MARGARETE L. SARGENT,
Professor of Modern Languages.
EDWARD O. SCRIVEN, B.S.,
Professor of Mathematics.
ANDREW P. ROLEN, M.S.,
Professor of Philosophy and English Bible.

Officers of the Faculty.

WILLIAM FIELDER.....President
MURREY KERR MARTIN.....Secretary and Registrar
JENETTE LEWIS.....Librarian

Committees of the Faculty.

RULES.—President Fielder, the Commandant, the Preceptress.

CATALOGUE.—Professors Frary, Martin and Scriven.

CLASSIFICATION.—Professors Martin and Conkling.

ATHLETICS.—Professors Frary, Martin and Major Green.

ACCREDITED SCHOOLS.—Professors Conkling and Frary.

SOCIETIES.—Professors Lewis, Frary, Sargent and Miss Robertson.

ENTERTAINMENT.—Professors Martin, Lewis, and Miss Antrim.

GENERAL INFORMATION.

Location.

Fort Worth University is located at Fort Worth, Texas, a thriving city of 55,000 inhabitants. Fort Worth is noted for its beautiful and healthful location on a tableland, on the south bank of the Trinity River, and is central to this great State. It has abundance of artesian wells, which afford a good supply of the purest water. The city has seventeen lines of railroad, making it easy of access from all points. The surrounding country is unusually free from all causes of malaria, while the city itself, with its macadamized streets and perfect sewer system, is unusually free from epidemics and all contagious diseases. The general elevation being high, the temperature in summer rarely rises above 100 degrees, yet in winter it seldom falls to 20 degrees above zero.

Access.

The University Campus and buildings of the College of Liberal Arts and Sciences are situated on the South Side of the city, about twenty minutes walk from the postoffice and Carnegie Public Library. Cars of the Northern Texas Traction Company pass the Campus on both the east and west sides. Cars passing on College Avenue east of the Campus are marked "University." Cars on the Henderson Street line passing the Campus on the west are marked "Henderson." Cars of both lines run on Houston Street from the Tarrant County Court House through the business section of the city and transfers to either line may be had from any car running up-town from the Texas & Pacific or Union Stations. Students coming to the University for the first time are especially requested to notify the President of the time of their expected arrival in order that they may be met at the railway station. Committees from the Young Men's and the Young Women's Christian Associations, wearing the College colors, will meet all trains during the opening days of each session.

Grounds and Buildings.

The University campus embraces an area of ten acres in one of the finest residence portions of the city. The campus affords

ample room for all outdoor sports. High elevation insures pure air, and the extensive grounds place the buildings beyond the annoyance of dust.

Four buildings have been erected on the campus—University Hall, Cadet Hall, Science Hall and the Dining Hall. These are plainly and solidly built; are commodious and well planned for their intended uses.

University Hall is eighty-five feet front, eighty-four feet deep, and three stories high. On the first floor are the chapel, study hall, President's office, recitation and toilet-rooms. On the second floor are the reception-rooms, class-rooms, Conservatories of Music and Oratory, the library, reading-room and art studio. On the third floor are practice-rooms and hall for societies. The building is well arranged for ventilation and all sanitary conditions are good.

Cadet Hall is devoted to the use of the young men only. Corridors run the entire length of the building on each floor. The cadets are subject to military discipline.

Science Hall is provided with a museum, chemical, physical and biological laboratories. In Science Hall is also located the Gymnasium, well equipped and including hot and cold water baths. The University has its own artesian well, carrying abundance of pure water into all the buildings.

The Dining Hall has dining-room, serving-room, and kitchen on the lower floor, and dormatories above. The dining-room seats 150 persons.

Residence.

All students from outside the city are required to room and board in the University buildings. If, however, parents or guardians desire to make other arrangements for them, they will be allowed to do so, provided that they first submit their plans to the President. Students living on the campus may change their residence only with the consent of the same authority. Speaking generally, better work is done and higher attainments reached when they are under the immediate influence and direction of the officers.

All private families, who board and room students, will be expected to co-operate with the Faculty in securing conformity to the regulations of the institution. Whenever this is not done and fact is known, students will be requested to seek new accommodations. Concert of action is essential to the school's highest efficiency, and to the student's greatest good.

Those who occupy rooms in the halls of the campus are expected to conform to such regulations as may be necessary to secure the quiet and order of a well-regulated home. They do not leave the grounds without permission from the President, Preceptress or Commandant.

The boarding department furnishes an abundant supply of good, wholesome food, well cooked and served, with consideration of what is best suited for each season. Members of the Faculty sit at table with the students, and the meals are conducted as in well-ordered and refined homes.

The rooms are large, pleasant and well ventilated. They are furnished with bedstead, mattress, washstand, crockery, table and chairs, and, in University Hall, with dresser and carpets. They are warmed, lighted, and provided with such janitor service as is found necessary. Students furnish pillows, bed linen and covering, toilet articles, table napkins and ring. *All articles must be marked with the owner's name.*

Religious Life.

While the University is Christian in character and positively moral, yet students are not compelled to attend any particular place of worship. Within easy walking distance are splendid Baptist Congregational, Methodist, Episcopal, Presbyterian, and Christian churches. It is demanded that by the third Sunday of the session each resident student shall have selected a church which he or she shall attend for the year. Unless good reason for the contrary are presented and the consent of the parents is secured, it should be the religious denomination which was attended at home, and every encouragement is given the students to identify themselves with its life and work as far as practicable.

Attendance upon chapel every Monday, Tuesday, Wednesday and Friday morning and upon church every Sunday morning is required. On Thursday morning the chapel hour is given over to the Young Men's and Young Women's Christian Associations and attendance upon this service is optional. A general prayer meeting, led by President Fielder, is held in the chapel every Wednesday evening, and is sustained by the students and members of the faculty alike.

Suggestions to Parents.

Every effort should be made to have the student present on the day of enrollment, and, except for extraordinary reasons, they

should not be permitted to leave until the end of the term. Each day of a school year is an important day. Hence, all absences, whether protracted or brief, are detrimental to the best work.

When students are making a good record they should be complimented; when they are doing poor work they should be stimulated. Parents can do much toward strengthening the hands of the teachers and making their work successful, if only they will pursue the right course. A wise word from the home is often of incalculable value. It is like "apples of gold in pictures of silver."

All persons having children or wards in the University are invited to communicate with the President and Faculty regarding them. It is our plan, purpose and ambition to build up and maintain a school not only of high grade, but of great practical usefulness. We will, therefore, welcome all criticisms and suggestions looking toward this end. If we can serve you by awakening the aspirations or by protecting the characters of your sons and daughters we shall be delighted to do so.

Expenses.

The school year has been divided into two terms of eighteen (18) weeks each, but the rates given here are for one-half term, or nine (9) weeks only.

Tuition (Collegiate Department)	$ 12.50
Tuition (Academic Department)	10.00
Tuition (Sub-Academic Department)	7.50
Tuition (Junior Preparatory Department)	7.00

Students taking two or more studies in the Collegiate Department will be charged regular College rates.

Persons taking three studies in any department will be charged the full rates for that department.

Those desiring to carry one or two studies only must make special arrangements. Also those wishing to take more than four.

Special Fees Required of All Students in Academy and College.

Matriculation fee (required of new students)	$3.00
Registration fee (required of all who do not enroll during the first two days of the term)	1.00
Incidental fee (day students)	.50
Incidental fee (boarding students)	1.00
Library fee	.25
Gymnasium fee	.75

Laboratory Fees.

Chemistry, inorganic	$2.50
Chemistry, analytical	3.00
Chemistry, organic	4.00
Physics, academy	.75
Physics, college	2.00
Biology, college	1.50

Graduation Fees.

Diploma fee for graduation from the Academy	$ 2.00
Diploma fee for any degree, except M.D., on graduation	10.00
For degree of M.D.	25.00
For the Master's degree or for any honorary degree	15.00

Music.

Pianoforte.

Two 30-minute lessons per week	$18.00
One 45-minute lesson per week	13.50

The above charges include one hour and a half class-work each week.

Two 30-minute lessons per week (with assistant teachers)	$13.50

Class lessons may be especially arranged for.

Musical Kindergarten.

Twenty-four lessons	$ 9.00

Teachers' Training Department.

When not enrolled as piano pupils	$ 6.00

Pipe Organ.

One lesson per week	$13.50

A small additional fee will be charged for the organ used during practice.

Voice Culture.

Charges same as for Violin.

Sight-Singing and Chorus Classes.

A nominal fee will be charged merely to cover the expenses of supplying the necessary music.

Violin.

Private lessons—one hour per week.....$27.00
Private lessons—two half-hours per week..... 27.00

Harmony, Composition, etc.

Private lessons same as piano.
In classes of 4 or more, one 60-minute lesson per week, per term .....$ 6.75

Rent of Piano.

1 hour per day.....$ 2.25
2 hours per day..... 3.75
3 hours per day..... 5.00
4 hours per day..... 6.00

Art.

Drawing, 18 lessons $13.50
Painting—water colors, 18 lessons 13.50
Oil, 18 lessons 13.50
China 13.50

Oratory and Elocution.

Eighteen lessons $15.00

Physical Culture.

Two private lessons per week.....$15.00
Three class lessons per week..... 12.00

Medical and Commercial Schools.

Medical Department, per year $75.00
Commercial Department (see end of Catalogue.)

BOARDING.

Table board, per week	$ 3.00
Rooms in University Hall, two occupants, per week, each	.75
Rooms in University Hall, one occupant, per week	1.25
Rooms in Cadet Hall, two occupants, per week, each	.50
Rooms in Cadet Hall, one occupant, per week	1.00
Rooms in Science Hall, per week	1.00
Laundry, per week	.50

This provides for young men, 8 plain pieces, and 25 cents worth of starched pieces; for young women, 8 plain pieces and 4 starched pieces.

Laundered pieces additional, charges as listed.

Guests and day students who take meals in the dining-room will be charged 20 cents per meal.

As seen by the above, the expenses of the school year for tuition, boarding, lodging and laundry reaches only the moderate sum of $175—$215.

Payments.

All students are enrolled for the school year, or the current term, unless special arrangements are made with the President.

All bills for tuition, incidentals and fees are due and must be paid *in advance* at the beginning of each half term.

All expenses for board, room and laundry must be met, at least monthly, in advance.

Before a student is admitted to any class, his enrollment card must bear the stamp of the Treasurer.

No student will be allowed to graduate from any department until he has paid or satisfactorily adjusted all bills.

Discounts and Rebates.

On all advanced payments for the entire school year a discount of 8 per cent. will be allowed.

Where three or more persons come from the same family, a similar discount will be given, *if payments are made at the beginning of each half term.*

Ministers of the Gospel, credentialed candidates for the ministry, and sons and daughters of ministers who are actively engaged is pastoral work, will be charged only one-half the regular rates of tuition.

Rebate on tuition will be given only in cases of sickness of not less than four weeks' duration, and then only one-half of the balance for the time allowed. A two weeks' absence will be necessary to entitle a student to rebate on board.

No rebate will be allowed for loss of lessons in Music, Elocution, Oratory or Physical Culture, unless it is our fault.

All applications for rebates, discounts or special rates must be made to the President.

Financial Aid.

It is made possible every year for a few students of each sex to earn a part or the whole of their expenses, by employment on the campus. Also, work can sometimes be obtained in the immediate vicinity. Persons needing or desiring such positions are advised to write the President at an early date.

Conditions of Admission to the University.

Students will be received at any time and classed according to their attainments; but it is hoped that as far as possible they will arrange to enroll at the first of the term.

Students below college grade will be admitted, upon certificate or such examination as will indicate standing, to suitable classes in the Preparatory Departments. Those coming from other schools, who bring creditable certificates not more than one year old will be excused from examinations in studies therein designated as passed. However, if students so admitted prove to be deficient in any of these subjects, they will be liable to reclassification.

Applicants for admission to the Freshman Class, from other colleges and all good high schools, will receive credit, without examination, for those sub-Freshman branches which their certificates show to have been completed. To secure such exemption, students must present their certificates, with a statement of their grades and the amount of work done in each branch. No certificate more than a year old will be valid for admission to the Freshman Class; and students so admitted will be subject to different classification if found deficient in any branch of study.

All other applicants for admission to the Freshman Class will be received only upon examination.

Candidates for advanced standing, after having presented to the President their certificates of admission to the Freshman Class, will be examined by the professor in charge of the several depart-

ments. Students who desire credits on work in Science done elsewhere should submit their note-books of laboratory exercises.

The courses of study are arranged in that order which will secure the best development of the mind and furnish the broadest culture. All studies are, therefore, to be pursued in the order laid down in the curriculum. Students desiring, for sufficient reason, to pursue special studies, are permitted to do so, the several professors being judges of their fitness to do such work. Such permission not intended to apply to students expecting to become members of any regular college or preparatory class. No student will be allowed to drop any subject, required or elective, except upon permission from the Faculty. Work so dropped will not be credited to the student.

Methods of Instruction.

The school day is divided into a suitable number of periods of fifty minutes each. These periods are devoted entirely to class work. Preparation therefor must be made either at home or under suitable supervision, in one of the study halls. Students boarding on the campus, who attain the grade of "D," and whose conduct is satisfactory, may, however, be allowed to study in their rooms, under supervision of the proper authorities.

Study hours for boarding students are observed from 8 a. m. to 12 m., and from 1 p. m. to 4 p. m., and from 7 p. m. to 9:40 p. m.

Instruction is given by recitations, lectures, laboratory exercises, field excursions, drills, reviews, and written and oral examinations.

Attendance.

1. Students shall be in their places every day of the term, unless prevented by sickness. They shall be present at their recitations and other exercises assigned by their instructors; at chapel exercises; at divine service on each Sunday.

2. Tardiness in attendance is excusable only when satisfactorily accounted for at the close of the exercises where such lateness occurs.

3. Absences from church or chapel are accounted for to the secretary. Absences from lectures or class exercises are accounted for to the teacher in charge.

4. Continued unexcused absence or tardiness may lead to suspension.

5. Permission to be absent from the University can be given only by the President or presiding officer.

Examinations.

1. Examinations upon the entire work of each term will be held on the last two days of the term, except during Commencement week, when examinations will be held as per calendar.

2. No student shall be admitted to the regular class examination in any subject who has been absent from class in that subject one-third or more of the time, unless the work be made up to the satisfaction of the professor in charge. Work so made up will be given two-thirds credit. If work be not so made up, a special examination must be taken under conditions of No. 5 (below).

3. Examinations at other than appointed times are subject to the approval of the professor of that department to which the subject belongs.

4. The character of the work performed by each student in every study is indicated by the letters AA, corresponding to a grade between 95 and 100; A, from 90 to 95; B, from 85 to 90; C, from 80 to 85; D, from 75 to 80; E, from 70 to 75; F, failure, below 70. A record of the daily recitations, test examinations, and term examinations in each department is preserved, and at the close of each term, from the department records the grades of the students are determined and reports of the same given to them. The minimum grade in any study upon which a student will be passed is E.

Accurate records are kept of the date of entrance, course pursued, and grade made in each study by every student; and the standing of any student, upon request, will be forwarded to parents or guardians at the end of each term.

5. No student shall be entitled to examination at other than the regularly appointed time, except upon presentation to the professor of a permit from the President of the University, for which the student shall pay $1.00.

6. Students conditioned in any subject (those receiving a grade slightly below E) will be re-examined in such subject or subjects at such time as the Faculty may decide.

Classifications.

1. Deficiencies amounting to one term's study are not a bar to preparatory classification.

2. In college classes no student will be promoted who is back more than two one-term studies, or more than one two-term study.

Degrees.

The University confers upon those who satisfactorily complete the Classical course the degree of Bachelor of Arts; the Scientific course, Bachelor of Science; the Philosophical course, Bachelor of Philosophy; the Literary course, Bachelor of Literature; the Medical course, Doctor of Medicine.

The corresponding Master's degree will be conferred upon Bachelors of three years' standing who have sustained a good moral character, and have pursued advanced studies upon presentation of a satisfactory thesis.

Candidates for Masters' degrees should make application for the same to the President, inclosing the diploma fee, two months prior to the annual Commencement.

Prizes.

Mitchell Medal.—Mr. J. E. Mitchell, jeweler, of this city, has donated a beautiful $50 gold medal, to be awarded annually for the best oration.

Jaccard Prize.—Mr. F. W. Jaccard, of Fort Worth, will give each year a valuable prize to be competed for by the students in the School of Oratory.

Osborne Medal.—Rev. H. R. Osborne will give a medal to be awarded annually to the student receiving the highest grade in a series of not less than six debates.

Societies.

There are regularly organized literary societies—two for young men and two for young women. They hold their session once each week in their own halls.

Active organizations of the Young Men's Christian Association and the Young Women's Christian Association are maintained.

Each association has its own library of books selected for their helpful influence in forming character.

Oratorical Association.

The University is one of the seven institutions forming the Texas State Oratorical Association, composed of Baylor University, Southwestern University, Texas Christian University, Austin College,

Trinity University, Fort Worth University and the State University of Texas. An annual contest is held, at which the successful local contestants strive for the prize. The winners of the local contest represent their respective schools in the general State contest. come in the Courses of Instruction.

Physical Culture.

The need of physical training as a part of complete education is recognized at the University. This is provided for the young men in the military drill, gymnastics, and games of the Athletic Association. The young women take regular exercise in walking, games, and gymnastics under the direction of the teacher of physical culture.

Athletic Association.

Legitimate games and sports of all kinds are encouraged at the University. The Athletic Association, in conjunction with the Board of Athletic Control, has charge of outdoor sports. All students having paid the athletic fee of seventy-five cents per one-half term are members of the association and have equal right to participate in its operation. The Board of Athletic Control is composed of two members elected by the Faculty, two student members from the Athletic Association, and one alumnus, or member of the Board of Trustees, to be elected by the other four. The board has full control of all funds of the association, and disburses one-half the income from the athletic fee, charged of all students. It also has general supervision of all athletics of the school, sanctioning schedules, awarding letters, etc. The past year, 1906-1907, was the first year of operation of the Board of Control and it may be safely said that it has passed the experimental stage and proven a much better plan than the method formerly used. The Faculty exercises a general advisory control and averts dangerous tendencies or unwise excesses.

Library and Reading Rooms.

Good rooms, well lighted and ventilated, have been set apart for reading-room and library. A very superior collection of books on general literature, history, normal work, fiction, and poetry has been secured, and each year adds to the number. Five hundred dollars has been donated as a memorial for books in the department of history. Hon. Robt. McCart has filled a one-hundred-dollar alcove

with choice books in memory of his mother. Mrs. H. W. Tallant is carrying out the intention of her deceased husband in filling an alcove with philosophical works. Judge C. K. Bell has contributed between fifty and one hundred volumes of technical worth, and the Methodist Episcopal Book Concern, of Cincinnati, has recently added a valuable donation of over a hundred volumes, on various subjects, to their previous generous gifts.

The reading-room has leading daily, weekly, and monthly newspapers, while the magazine literature is abundant and of first quality. The reference library is well stocked and has a very valuable collection of Government reports, and is increased by each new volume as it appears.

The Carnegie Public Library of Fort Worth is available for use by the students. It is splendidly equipped in all departments and is of inestimable value to the school, being situated within easy walking distance as well as both car lines passing the campus.

Chemical Laboratory.

The Chemical Laboratory is on the first floor of Science Hall. It is a well lighted and ventilated room, furnished with desks fitted with drawers and lockers for each student, and with cases for chemicals. All desks are fitted with water and gas and tables, hoods, and the other features of a first class laboratory are provided. The equipment is sufficient to allow of each student being assigned a desk with a complete set of apparatus for general chemistry. There is also a good general laboratory equipment of burettes, balances, etc., necessary for qualitative, quantitative, and organic work.

Physical Laboratory.

The Physical Laboratory is on the first floor of Science Hall. It is fitted with work-tables and a large case, and supplied with water. It is equipped with apparatus for lecture use as well as for individual experimentation in mechanics, acoustics, light, electricity, and magnetism.

Biological Laboratory.

The Biological Laboratory occupies a large room on the second floor of Science Hall. It is well adapted for microscopical purposes and supplied with water and gas. It is equipped with tables, com-

pound microscopes, microtome, turn table, and a full supply of necessary reagents and apparatus for biological work. Besides drawings, charts, and skeleton, it has also dry and alcoholic specimens for illustrating various groups of animal life. Botany is represented by a local herbarium, to which additions are being made. It is also well equipped with dishes, stains, paraffine baths, etc., necessary for histological work. A complete heliopticon and projection outfit has been purchased. For use with this, the Laboratory has a number of physiographical, geological, and bacteriological slides.

COURSES OF INSTRUCTION.

Bible and Philosophy.

PROFESSOR ROLEN.

FIRST AND SECOND TERMS—Junior Year. The Scriptures will be taught in the vernacular. A historical course will be pursued, with Smith's "Students' Series" for text-books, and will be supplemented by critical study and reading of representative authors. Lectures on the Bible will be a part of the method used in teaching. Two hours.

FIRST TERM—Junior Year. *Logic.* Text-book, Jevons' "Elementary Lessons in Logic," from which frequent recitations are required, with written exercises and original work. Aim, to acquaint with the laws and methods of correct thinking. Four hours.

SECOND TERM—Junior Year. *Psychology.* Text-book, Dewey, from which recitations are made; these are supplemented by discussions. Lectures given on special themes. Four hours.

FIRST TERM—Senior Year. *Evidences of Christianity.* Text-book, Fisher. The effort is made to present to the student the logic of Christian evidences and the ground of Christian belief. Collateral studies will be used and lectures given. Four hours.

SECOND TERM—Senior Year. *Ethics.* A brief survey of the leading ethical systems. Discussions and disquisitions are required on the fundamental problems of moral obligation, the native function and authority of conscience, and the formation of character. Lectures will supplement recitations from selected texts. Four hours.

Elective.

FIRST TERM—*History of Civilization.* Text-book, Guizot. Collateral studies and lectures. Four hours.

SECOND TERM—*History of Philosophy.* Text-book, Schwegler. A brief survey of the philosophical schools from the first to modern systems; supplemented by discussion and lectures. Four hours.

History.

PROFESSOR LEWIS.

FIRST AND SECOND TERMS. *History of Europe from* 1779 *Modern History.* (Required.) Mediæval History: The history of Europe from the fall of the Roman Empire, to the Reformation. First half, four hours.

Modern History: A continuation of the above, bringing the general history of Europe down to the close of the nineteenth century. Second half, four hours.

FIRST AND SECOND TERMS. *History of Europe from* 1879 *to* 1815: causes and events connected with the period of the French Revolution and the Napoleonic Wars. Four hours, half year.

The Nineteenth Century. The evolution of Constitutional Government in the European States; unification of Germany and Italy; the Eastern Question and present political conditions. Four hours, half year.

Latin.

PROFESSOR MARTIN.

In the instruction given in Greek and Latin two objects are kept in view: first the mental discipline gained from the study of languages so highly developed and so closely related to our own; second the knowledge and pleasure derived through acquaintance with the literature of the Greeks and Romans.

In the Freshman year both Greek and Latin are required of all candidates for the A. B. degree. In the Sophomore year the student may choose either one (as required work) and elect the other.

FIRST AND SECOND TERMS—Freshman. Cicero, DeAmicitia and De Senectute, Latin Prose, Horace, Odes and Epodes. Four hours.

Elective.

FIRST AND SECOND TERMS—Horace, Satires and Epistles, Terence, Andria. Plautus, Captivi. Three hours.

FIRST AND SECOND TERMS—Cicero, Letters. Terence, Phormio, Plautus, Menaechmi. Three hours.

Greek.

PROFESSOR MARTIN.

FIRST AND SECOND TERMS—Freshman. Lysias, Orations. Plato, Apology and Crito. Greek Prose. Four hours.

Elective.

FIRST AND SECOND TERMS—Aeschylus, Prometheus Bound, Euripides, Medea. Aristophanes, selected plays. Demosthenes, De Corona. Three hours.

FIRST AND SECOND TERMS—Sophocles, Antigone, Euripides, Iphigenia in Tauris. Homer, rapid reading of Iliad or Odyssey. Three hours.

English.

PROFESSOR CONKLING.

FIRST AND SECOND TERMS—Freshman. *Rhetoric and Composition.* Two hours throughout the year. Elementary instruction in the theory and practice of English composition. Weekly themes throughout the year. Required for all Freshmen. Two hours.

FIRST AND SECOND TERMS—Sophomore. *Composition, Argumentation.* Text-book—Buck, Argumentative Writing. Recitations. Written Exercises. Themes. Two hours.

Elective Work.

(1) *English Literature*—History of English Literature. A large amount of supplementary reading required. This course is designed for students who desire only a general acquaintance with English literature, and should be elected early in the course. Two hours throughout the year.

(2) *Early English Literature.* This course is devoted to both literature and languages. Text-books—Cook, First Book on Old English; Wyatt's edition of Beowulf; Cook's edition of Cynewulf's Christ. Literature of the fourteenth century. Chaucer, Langland. The metrical romances and beginning of the drama. Three hours throughout the year.

(3) *Shakespeare.* A critical examination of the works ascribed to Shakespeare, with study of his life and character. Close reading and critical study of selected plays, with rapid reading and discussion of others. Text-books—The Arden Shakespeare; Dowden's Primer of Shakespeare; Woodbridge, The Drama; Its Laws and its Technique. Three hours throughout the year.

(4) *English Masterpieces of the Nineteenth Century.* The course will include selections from many authors of the time, together with a critical study of Browning, Ruskin, Carlyle, Tennyson and others. Three hours throughout the year.

German, French and Spanish.

PROFESSOR SARGENT.

Three languages, German, French and Spanish, are offered in this department to students of the Academy and College. The primary object in this study is to give to the students a practical and critical knowledge of the languages, particular stress being placed upon the idiomatic expressions and pronunciations.

Students entering classes late or without either language are given an opportunity to make up the same. If students in the lower classes wish to take up a modern language new classes will be formed for them if a sufficient number apply for such instruction and an additional fee will be charged for same. Permission to enter such classes, however, will only be granted if the respective student makes a passing grade in his regular studies.

German.

FIRST TERM—Freshman. Collar's Eysenbach, Essentials of German Grammar, easy conversation, translation of easy prose, drill in German pronunciation and German script. Reading of Guerber's Marchen und Erzahlungen. Part I. Four hours.

SECOND TERM—Freshman. More advanced grammar and German conversation based on text. Syntax, word order sentence—structure, memorizing of easy poetry. Reading of Guerber's Marchen und Erzahlungen, Part II. Seidel, Leberecht Huhnchen. Four hours.

FIRST TERM—Sophomore. This course is designed to lay a broad foundation for the intelligent study of the language. Class lectures on German life, history and literature will be given from time to time. Course is conducted in German. Three hours. Text-books—Helbig Komodie auf der Hochschule. Schiller's Lied von der Glocke.

SECOND TERM—Sophomore. Stern's Geschichten von deutschen Stadten. Schiller's Wilhelm Tell. Three hours.

Elective.

FIRST TERM—Junior. Study of the German drama and the best German lyrics and ballads. Prose composition. Course conducted in German. Text-books—German Lyrics and Ballads, Lessing's Minna von Barnhelm. Three hours.

SECOND TERM—Junior. Advanced literature and study of the best authors, interpretative reading of text. Text-book—Goethe's Hermann und Dorothea. Dictionary. Three hours.

French.

FIRST TERM—Freshman. This course is intended to give the student a thorough knowledge of the essentials of grammar, the first year being devoted to a careful study of its fundamental rules, easy translation and conversation. Text-books—Fraser and Squair's French Grammar, Francois and Giroud Simple French. Anecdotes Faciles. Four hours.

SECOND TERM—Freshman. Memorizing easy poetry, continuation of grammar and reader, with French conversation based on text. Four hours.

FALL TERM—Sophomore. More advanced grammar and free compositions and letter writing. French conversation. Text-book—Syntaxe Practique de Langue Francaise par Meras; Quatre-Vingt-Treize. Hugo. Four hours.

SECOND TERM—Sophomore. Prose compositions based on text. Text-book—Le Roman d'un Jeune Homme Pauvre. Four hours.

Elective.

FIRST TERM—Junior. French drama from the beginning to the present day. Reading of choice plays from the best authors and essays based on text. Three hours.

SECOND TERM—Junior. Outline History of French Literature. Text-book—Historie de la Litterature Francaise. Three hours.

Spanish.

FIRST TERM—Hill's and Ford's Spanish Grammar, and translation of easy prose and sight reading. Easy conversation. Four hours.

SECOND TERM—Memorizing of short poems. Advanced grammar. Text-books—Ramsey's Spanish Reader, Aunsi's Victoria y otros Cuenlos. Four hours.

Mathematics.

PROFESSOR SCRIVEN.

FIRST TERM—Freshman Year. *College Algebra.* Four hours.

SECOND TERM—Freshman Year. *Plane and Spherical Trigonometry.* Four hours.

FIRST AND SECOND TERMS—Sophomore Year. *Plane and Solid Analytic Geometry.* Three hours.

FIRST AND SECOND TERMS—*Differential and Integral Calculus.* This course may be elected in either the Junior or Senior year. It is required of all candidates for the B. S. degree. Three hours.

Elective Work.

Classes in the various branches of Higher Mathematics may be organized to suit the needs of the students.

Chemistry and Physics.

PROFESSOR FRARY.

FIRST AND SECOND TERMS—Freshman. *General Chemistry.* A systematic study of the elements and their compounds with more or less attention to the application of chemical knowledge in the arts and sciences. Attention is given to the history of chemistry. Three hours recitation and three hours laboratory work throughout the year, but the instructor reserves the right to alter the division of time as conditions demand.

FIRST AND SECOND TERMS—Sophomore. Qualitative and Quantitative Analysis. One hour recitation and eight hours of laboratory work per week.

FIRST AND SECOND TERMS—Elective for Juniors and Seniors. *Advanced Quantitative Analysis.* Includes much work in practical analysis. Ten hours of laboratory work per week.

FIRST AND SECOND TERMS—Elective for Juniors and Seniors. *Organic Chemistry.* Two hours recitation and six hours of laboratory work per week.

FIRST AND SECOND TERMS—Junior Year. *College Physics.* Three lectures and two laboratory periods per week throughout the year.

Biology and Geology.

PROFESSOR FRARY.

FIRST AND SECOND TERMS—Freshman or Sophomore Year. *Biology.* Lectures, recitations and laboratory work. Four hours.

FIRST TERM—Senior Year. *Geology.* Four hours.

THE ACADEMY.

The work of this department of the University is to fit young men and young women for college, and also to provide for those who cannot complete a college course a thorough academic education.

There are four courses arranged to meet the requirements of the courses in the College of Liberal Arts—the Classical course, the Scientific course, the Philosophical course, and the Literary course. Upon the completion of any of these courses students are given diplomas which admit them to the corresponding course of the College of Liberal Arts.

The classes in the Academy are taught by the professors of the College of Liberal Arts with the assistance of the necessary instructors and tutors.

COURSES OF INSTRUCTION.

English Bible.

PROFESSOR ROLEN.

FIRST AND SECOND TERMS—Fourth Year. The aim of the course is to familiarize the student with the Scriptures. One hour a week.

History.

PROFESSOR LEWIS.

FIRST AND SECOND TERMS—First Year. *American History.* The history and government of the United States. Five hours.

FIRST AND SECOND TERMS—Second Year. *Ancient History.* History of the ancient nations. The government, institutions, literature and arts, especially of Greece and Rome, are subjects of study; also the chief events of the early Middle Ages down to the death of Charlemagne. Five hours.

FIRST AND SECOND TERMS—Fourth Year. *English History and Civics.* The history of England with special reference to social and political developments will be studied for six months. The remainder of the year will be taken with the study of the Constitution of the United States and the National Government. Four hours.

Latin.

PROFESSOR MARTIN.

FIRST AND SECOND TERMS. Second Year. First Year Latin. *Caesar* begun. Grammar. Five hours.

FIRST AND SECOND TERMS—Third Year. *Caesar*, four books completed. *Cicero*, Orations begun. Four hours. Latin Prose, one hour.

FIRST AND SECOND TERMS—Fourth Year. *Cicero*, Orations continued. *Vergil, Aeneid.* Scansion. Mythology. Four hours.

Greek.

PROFESSOR MARTIN.

FIRST AND SECOND TERMS—Third Year. White's First Greek Book. *Anabasis.* Greek Prose. Four hours.

FIRST AND SECOND TERMS—Fourth Year. *Anabasis*, four books completed. Greek Prose. *Homer*, *Iliad* or *Odyssey.* Scansion. Four hours.

English.

PROFESSOR CONKLING.

FIRST AND SECOND TERMS—First Year. *Grammar.* Five hours.

FIRST TERM—Second year. *English.* Five hours.

FIRST AND SECOND TERMS—Third year. *English.* Three hours.

FIRST AND SECOND TERMS—Fourth year. *Rhetoric.* Four hours.

German and Spanish.

PROFESSOR SARGENT.

FIRST AND SECOND TERMS—Third Year. *German.* This course is the same as that outlined for the Freshman year in the college. Required of scientific students. Four hours.

FIRST AND SECOND TERMS—Fourth year. *German and Spanish.* These courses are the same as those outlined for Sophomores or Juniors in the college. German is required of all scientific students and literary students elect either German or Spanish. Four hours.

Mathematics.

PROFESSOR SCRIVEN.

FIRST AND SECOND TERMS—Second year. *Algebra.* Five hours.

FIRST AND SECOND TERMS—Third year. *Plane and Solid Geometry.* Five hours.

Science.

PROFESSOR FRARY.

SECOND TERM—First Year. *Physiography.* Five hours.

SECOND TERM—Second year. *Botany.* Five hours.

FIRST AND SECOND TERMS—Fourth year. *Physics.* Three recitations and three hours of laboratory work per week.

Sub-Academic.

MAJOR E. GREEN.

MISS ELIZABETH ROBERTSON.

Owing to the fact that many young people who desire to complete a college education are not prepared to enter the Academy, a Sub-Academic Department will be conducted, offering studies preparatory to the Academy. In the Sub-Academic Class will be given practical arithmetic, grammar, Texas history, reading, writing, physiology and spelling.

MILITARY SCHOOL.

MAJOR E. GREEN, Commandant.

Military drill is required of each young man rooming in Cadet Hall, and must be regarded as a part of the regular work; and it is obligatory on all young men living on the campus except in such cases as may be excused by the Faculty. Drill is likewise open to day students who may desire to avail themselves of the privilege, when they provide themselves with uniforms.

Course of Instruction.

Instruction is twofold: practical, which includes excursions, target practices and all the drills for squad, company, and battalion formations; and theoretical, which includes the study and recitation of infantry tactics and military science by an officers' school and a "non-com" school.

Advantages Offered.

1. In dress.—Extravagance and foppishness are avoided. Habits of economy, neatness, and the preservation of clothing are cultivated, and the obnoxious idea that dress makes the man is eradicated.

2. In cost.—By reason of uniformity in clothing, boarding and all arrangements, the school is saved some expense, the benefits of which accrue to the patrons.

3. In time.—All duties are so systematized that time can not be squandered.

4. In physical development.—The regular life promotes health, and the drill gives ease of manner and graceful carriage.

5. In habits.—The military system inculcates promptness, method, neatness, persistence, obedience, self-command, and self-dependence.

6. In manhood.—Officers are selected from the cadets, promotion being dependent upon the records made for ability and general manhood in the recitation rooms and upon the grounds and streets.

7. In general.—In the inculcation of the due respect for authority, and high regard for honor, truthfulness, and devotion to duty; in the ever-present idea of responsibility for trusts, and in the demand for the exercise of patience, close observation, promptness in decision, firmness, discretion, and the exercise of every virtue that goes to make a man.

Outfit.

Cadets must each be supplied with the articles named below, plainly marked with owner's name: One pillow, two pillow-cases, pair of blankets, two pair of sheets, one comforter, four dress shirts, two night shirts, bag for soiled clothes, underclothing suitable for the season, four towels, four napkins and ring, umbrella, toilet articles, blacking-brush, needles and thread, handkerchiefs, cuffs, collars, and hosiery. It is better to provide all these things at home before coming to the University.

Uniforms.

The young men are required to have a uniform of dark blue clothes, consisting of coat, cap, and trousers. This makes a good, nice suit of clothes, and with proper care will last the whole season. In the spring they are uniformed in Khaki for fatigue wear. Provisions for taking measurements and making the uniforms to order as soon as school opens are arranged by the institution. In view of this arrangement, parents are requested not to provide unnecessary civilian clothes. Students entering school after the Christmas holidays will only be required to get the Khaki uniform.

Cadets are not allowed to dispose of uniforms during the year.

ORGANIZATION OF BATTALION.

Officers and Non-Commissioned Officers.

Major E. Green	Commandant
Lieut. H. T. Thornberry	Assistant Commandant
Will H. Scarborough	Captain
Harry T. Thornberry	First Lieutenant
Joe L. Ward	Second Lieutenant
Ashton C. Woodruff	Second Lieutenant
Hugh Scarborough	Second Lieutenant
Wm. Frederick McClesky	Sergeant

JOHN T. SELLMAN.....Bugler

CONSERVATORY OF MUSIC.

HARRIET MYRTLE HESS,
Director of Piano and Normal Training Department.

PROFESSOR CLAUDE A. ROSSIGNOL,
Director of Voice and String Department.

WYNNI PYLE,
Piano. Interpretation.

HERBERT STARR,
Organ and Harmony.

BERTHA HORN,
Piano. Assistant in the Children's Department.

It is the aim of our School of Music to create a desire for thorough conscientious work with a view to a professional career in some branch of the art, as well as the pursuit of its studies for cultural purposes.

The advantage of Conservatory over private instruction is so manifest that it is hardly necessary to enumerate the many points in its favor. The culture and moral tone to be found in a university are the greatest helps to a student pursuing a musical education.

Then there are the many lectures, recitals, concerts, etc., which create a musical atmosphere that is invaluable.

It is impossible for a private teacher to give the proper attention to such branches as Harmony, Composition, History of Music and related subjects, which are absolutely essential to a thorough musical education.

Course in Piano.

The regular pianoforte course of study has been divided into four departments as follows:

The Preparatory (including the Children's Department), the Academic, the Collegiate, the Normal.

The following outline of studies indicate the standard of technical difficulty in the various departments:

Preparatory Course.

Elements of pianoforte playing, including hand culture, touch, notation, together with melody construction, rhythm, study, elementary harmony, ear training. Books of instruction are used according to individual needs. A limited number of etudes by representative composers; sonatas and rondos by Clementi, Kuhlau, Reinecke, Gurlitt and others; smaller compositions by Handel, Bach, Mozart, Beethoven and others; easiest sonatas of Haydn and Mozart; selections from easier works of Schumann, Grieg, Kullak, Reinecke and others.

Academic Course.

Harmony continued, Musical History, further development of technique, including major and minor scales in various forms, chords, arpeggios, octaves, etc. A limited number of etudes from the best authors, such as Heller, Foote, Krause, Czerney, Cramer; preludes, two part inventions, dance forms of J. S. Bach; sonatas by Haydn, Mozart and others; easier sonatas of Beethoven; compositions of moderate difficulty by Mendelssohn, Schubert, Schumann, Chopin, Grieg, Raff and others.

Collegiate Course.

Counterpoint (single and double), Analysis of Musical Forms, selections from suites of Bach and Handel; well tempered clavichord by Bach; a limited number of etudes by Clementi, Czerny, McDowell, Liszt, Chopin and others; the more difficult sonatas of Beethoven; solo works of Weber, Mendelssohn, Chopin, Schumann, Liszt, Schubert, Rubinstein, Grieg, Brahms and others; piano concertos by great composers and some chamber music.

Normal Course.

One year of Piano added to the work of the Preparatory and Academic Departments, together with our year's attendance upon the Teachers' Training Department.

Classes.

Pupils of all grades are organized into classes which meet once a week for instruction in theory of music, technic, musical history, ear training and sight reading.

CONDITIONS.

The time required for graduation cannot always be determined in advance. Generally speaking, for adults the Preparatory requires two years, the Academic one year, the Collegiate from one to two years.

Each of the above departments is divided into two grades. Pupils may enter any grade for which they are qualified.

A diploma will be granted upon the completion of the Collegiate Course, or a certificate upon the completion of the Normal Course.

Teachers' Training Department.

In view of the fact that most piano pupils, though they may have become fine performers, have not the least knowledge of the art of teaching, a Teachers' Training Course is given each year. The course includes a series of lectures on the Art of Teaching, on musical forms, musical history, etc., and a class in technic for children which also outlines the rudiments of technic for adults. The system of technic for children is an adaptation, by Julia Lois Caruthers, Director of the Normal School of Piano, Chicago, accepted technical forms to small hands and child minds—the fingers moving to the rhythm of songs.

Musical Kindergarten.

There is a universally acknowledged difficulty attending the instruction of a child in the rudiments of music by the methods used in the past, and, at the same time, every teacher realizes the importance of the early instruction.

Too often music has been made to a child a most dreary and uninteresting study and the difficulties of securing under those circumstances the proper application have discouraged many parents and students. To meet the necessities involved here, numerous kindergarten methods and systems have been evolved, which makes the subject one of entertainment and interest to the child, and at the same time thoroughly grasps and provides the necessary instruction and training for a musical career.

Vocal Music.

Preparatory Grade.—Lessons in Physiology of Voice and Organs of Respiration; Position of Mouth and Throat; Special Drill in

Breathing Exercises for Developing and Combining Chest, Medium, and Head Tones; Exercises for Flexibility and Trills; Study of Scales, major and chromatic; Total Devitilization of Jaw and Tongue; Easy Ballads and Songs.

Intermediate Grade.—Practice of Major and Minor Scales, continued; Study of Embellishments, Trills, etc.; Marchesi's Elementary Studies; Vocalizes by Concone, Sieber and Panofka; Songs of more difficult grade and easy Operatic Selections; English Ballads, Sacred Songs and Selections from Mendelssohn, Schubert, etc.

Advanced Grade.—Exercises for Flexibility and Embellishments, continued; Special Practice on Trills; Marchesi's Progressive Studies; Vocalizes by Sieber, Panofka and Bordesi; Selections from Operas and Oratories; the more difficult English, German, French and Italian Songs.

CONDITIONS.

Candidate for graduation from Vocal Music will be required to sing at sight in any key phrases within the compass of their voices and without the aid of any instrument.

Pipe Organ.

Pupils of this Department will have the advantage of practice upon one of the splendid instruments which the city affords, and opportunity will be given for a training which shall fit the pupil to operate either a large or small instrument.

It is the aim of this course to give instruction in solo playing, and also to fit the pupil for practical church and concert work. To this end, those taking Organ as a special study are advised to begin early the study of Harmony.

An elementary knowledge of Music and moderate skill as a performer is necessary before the work on the Pedal Manual is begun. Students must have had two years' work in the regular Piano-Forte, or its equivalent before they will be accepted as pupils in Pipe Organ.

The course is modified and adapted to suit the needs of the individual. Work is required in pedal obligato, hymn tune playing, study in registration, accompaniment both for chorus and the solo voice, and more advanced work in solo form, including preludes and postludes suitable for church services, and later the fugue and sonata forms.

Violin.

INTERMEDIATE COURSE.

First Year.—The correct mode of holding the violin and bow; Scales of Easy Exercises in all major and minor keys from the works of Otto Langey, C. H. Hennings, Whichtle, De Beriot, Pleyel, and Dancla, with solos, duets and quartets compatible with the above-named studies.

INTERMEDIATE COURSE.

Second Year.—S. Keyser, Books II and III; Dancla, Book II; Whichtle's Practical Violin School; De Alard, Schradick, Classical Duets for Violin and Piano; Solos and Duos from such writers as Eichberg, De Beriot, Singlee, Mozart, Beethoven, Donizetti, etc.

COLLEGIATE COURSE.

Third Year.—Kreutzer's Forty-eight Studies; Fiorillo; Sporh, De Alard, David, De Beriot, with Concertos by Viotti, Rhode, Kreutzer, David and De Beriot.

Fourth Year.—Gavinee's and Rhode's Studies; sonatas by Mozart; solos from Mendelssohn, Leonard and Vieuxtemps.

Fifth Year.—Paganini, Caprices; sonatas from Bach; solos from Wisuawski, Beethoven and others.

Viola, Violincello, Guitar, and Mandolin.

Beginning with Scales and Easy Exercises and pursuing a similar course to the Violin.

DEPARTMENT OF ORATORY AND ELOCUTION.

Madge Pickler, Oratory and Elocution.

The province of this Department is to interpret through man's natural languages, vocal expression and pantomime, the ideals of the great souls who have stamped their art on our literature.

Aims and Purposes.

The work will comprehend all that relates to the fine art of public speaking in its broadest sense. It is based upon broad, scientific and artistic principles, that insure (1) health and strength, (2) scientific and artistic control of the body and mind, (3) literary and spiritual culture of the highest type. Above all, we preserve the individuality of each pupil, thus developing him along natural, rather than the mechanical channels.

Map of the Idea.

Factor 1—The Man.

The student is first taught the relation to himself as an instrument. He is freed from erroneous habits of thought, voice and action; his avenues of impression are opened, his imagination stimulated, and a knowledge and control of his agents of expression is developed.

Factor 2—The Message.

The student is then led into an understanding of the interpretative forms of literature, in which spirit is contrasted with form, and the thought realized in experience.

Whether the study be a poem, story, oration, character or play, he seeks primarily the "spirit of literature," the "inner sense of poetry." In this connection the highest technical training for artistic work on the platform, stage or class-room is given; the mental grasp strengthened; the emotional response to thought developed; and he is taught to control his emotions by his artistic judgment.

The following is a brief outline of the work of this Department:

I.

Vocal Training.

COURSES.

Elementary Principles of Vocal Expression, Assimilation and the Dramatic Instinct, Development of the Imagination, Qualities of Voice, Agility of Voice, Resonance and Tone Color, Phonology or Articulation, Pronounciation, Visible Speech.

II.

Training of the Body.

Organic Gymnastics, Harmonic Gymnastics, Co-operative Training, Grace, Elementary Pantomime, Manifestive Pantomime, Characterization.

III.

Creative Expression.

Recitations, Story Telling, Impersonations, Literary Abridgment, Orations—Platform work of all kinds.

A course in the "Psychology of Public Speaking" will supplement all the private and class work.

In addition to the regular study of the classics, special attention is given to the interpretation of Shakespeare and Browning.

A special course in the "Vocal and Literary Interpretation of the Bible" will be given for the benefit of students preparing to enter the Ministry.

The text-books used are by Dr. S. S. Curry, Ph.D., Acting Davis Professor of Elocution at Newton Theological Institution and President of the School of Expression of Boston, Mass.

Selected Reading.

A course in selected reading is given by the teacher of oratory and elocution for the benefit of pupils in the first year academy. Five hours a week.

Physical Culture.

MADGE PICKLER, Instructor.

There is a rapidly increasing recognition of physical education as an essential factor in modern education and a growing demand

for thoroughly qualified teachers and specialists in this field. The work of physical education should not be detached from, but closely related to the other activities and interests of the pupils. The instruction in matters relating to health and hygiene is of vital importance. No field of education needs teachers of broader, general, and technical training, finer personality and character, sounder judgment, keener sympathies, and more unselfish devotion to professional ideals and human service than this rarely understood field of activity, which, for lack of a better name, is called physical education.

The work in this department is designed and planned to secure a good carriage and to correct irregularities of body, such as uneven or stooping shoulders, carrying the head forward or to one side, etc.; also to produce ease and grace. The work is based upon the best Swedish and American systems, and consists of dumb-bells, wands, Indian clubs, pole and bar-bells, with such heavy apparatus work as the individual students can, without injury to themselves, perform.

FINE ARTS.

CHRISTIANA MACLEAN.

Arrangement of Studies.

First Year.—Drawing in Pencil, Charcoal, or Crayon, from Casts, Geometric Forms, Flowers and Plants. Arrangement and Drawing of Simple Still Life Studies, Flowers and Plants in Water Colors.

Second Year.—Drawing from the Antique Hands and Feet, Sketching from Nature, Studies from Still Life in Water Colors and Oil.

Third Year.—Drawing from the Antique Studies from Still Life in Water Color and Oil. Sketching from Nature and Life.

Fourth Year.—Drawing and Painting from Still Life and Life Models. Sketching in Oil and Water Colors.

A Course in the History of Art is taken up with each year's work.

A special course is arranged for those who do not wish to take the regular Drawing work in Decorative Art, Pyrography, Wood Carving, and Basket-making. The studio is furnished with a fine selection of studies in this line of work, especially in water colors from the Northern and Eastern studios.

MEDICAL DEPARTMENT
FORT WORTH UNIVERSITY

OFFICERS.

DR. WILLIAM FIELDER.....President of the University
FRANK GRAY, M.D.....Dean of the Medical Department
JULIAN T. FEILD.....President of the Faculty
IRA CARLETON CHASE, A.M., M.D.....Secretary of the Faculty

BOARD OF DIRECTORS.

F. D. THOMPSON, M.D.....President
JAMES ANDERSON, M.D.....Vice-President
BACON SAUNDERS, M.D., LL.D.....Secretary and Treaurer
W. R. THOMPSON, M.D. FRANK GRAY, M.D.

BOARD OF ADVISORS.

J. M. FORT, M.D.....Paris, Texas
A. W. FLY, M.D.....Galveston, Texas
J. T. WILSON, M.D.....Sherman, Texas
J. E. GILCREEST, M.D.....Gainesville, Texas
FERDINAND HERFF, M.D.....San Antonio, Texas
SAMUEL R. BURROUGHS, M.D.....Raymond, Texas
D. F. STUART, M.D.....Houston, Texas
P. C. COLEMAN, M.D.....Colorado, Texas
A. L. JUSTICE, M.D.....El Paso, Texas

Faculty of Medicine

WILLIAM FIELDER, D.D.....President of the University

Emeritus Professor.

ELIAS J. BEALL, M.D.....413 West Fifth Street
Emeritus Professor of Principles and Practice of Surgery and Clinical Surgery.

Professors.

JAMES ANDERSON, M.D.....407 Henderson Street
Professor of Principles and Practice of Medicine and Clinical Medicine, and Vice-President of the Faculty.

BACON SAUNDERS, M.D., LL.D.....426 Henderson Street
Professor of Surgery and Clinical Surgery.

JULIAN T. FEILD, M.D.....White Settlement Road
Professor of Obstetrics and Clinical Gynecology and President of the Faculty.

FRANK D. THOMPSON, M.D.....Sixth and Lamar Streets
Professor of Gynecology and Surgical Diseases of Women.

IRA CARLETON CHASE, A.M., M.D.....615 Lamar Street
Professor of Anatomy and Secretary of the Faculty.

FRANK GRAY, M.D.....506 Taylor Street
Professor of Diseases of the Eye, Ear, Nose and Throat, Lecturer on Anatomy of the Organs of Special Sense, and Dean of the Faculty.

EDGAR DOAK CAPPS, M.D.....Corner Sixth and Taylor Streets
Professor of Physiology and Diseases of the Brain and Nervous System.

ERNEST L. STEPHENS, M.D.....1008 West Weatherford Street
Professor of Materia Medica and Therapeutics, and Lecturer on Clinical Medicine.

WILLIAM R. HOWARD, A.B., M.D.....921 Cannon Avenue
Professor of Histology, Pathology and Bacteriology, and Curator of the Pathological Museum.

WILLIAM A. DURINGER, M.D.....Summit Avenue
Professor of Genito-Urinary and Rectal Diseases.

WILLIAM BEVERLY WEST, M.D.....1361 Pennsylvania Avenue
Professor of Dermatology and Syphilology.

WILLIS G. COOK, B.S., M.D.....650 Fifth Avenue
Professor of Chemistry and Toxicology and Lecturer on Physical and Clinical Diagnosis.

ROBERT B. GRAMMER, M.D.....200 Taylor Street
Professor of Pediatrics.

Associate Professors.

WILLIAM R. THOMPSON, M.D.....815 Lamar Street
Associate Professor Diseases of the Ear, Nose and Throat.

GOODRIDGE V. MORTON, A.B., M.D..Cor. Second and Lamar Sts.
Associate Professor of Obstetrics.

JOHN D. COVERT, M. D.....615 Calhoun Street
Associate Professor of Bacteriology, and Demonstrator of Histology, Pathology and Bacteriology.

CLAUDE O. HARPER, M.D.....710 Florence Street
Associate Professor of Physiology.

MARQUIS E. GILMORE, Ph.C., M.D.....North Fort Worth
Associate Professor of Materia Medica and Pharmacology.

JOHN H. McLEAN, A.B., M.D.....316 Henderson Street
Associate Professor of Principles and Practice of Medicine and Clinical Medicine.

Lecturers, Demonstrators and Assistants.

RUFUS CHAMBERS, M.D.....1417 East Twentieth Street
Lecturer on Minor Surgery and Bandaging.

W. ERNEST CHILTON, M.D.....Ninth and Houston Streets
Demonstrator of Anatomy.

LYMAN A. BARBER, M.D.....520 Wheeler Street
Demonstrator of Anatomy, and Lecturer on Clinical Medicine.

J. B. McLEAN, M.D.....1101 East Weatherford Street
Lecturer on Hygiene.

LEONIDAS A. SUGGS, M. D.....420 Broadway
Lecturer on Histology and Assistant to the Chair of Gynecology.

WILLIAM ROUNDS, M.D.....827 Cannon Avenue
Assistant to the Chair of Genito-Urinary and Rectal Diseases.

R. B. WEST, M.D.....421 Wheeler Street
Lecturer on Medical Jurisprudence and Life Insurance Examinations.

R. H. NEEDHAM, Ph.C.....North Fort Worth
Lecturer on Pharmacy, Demonstrator of Chemistry and Pharmacology.

FREDERICK A. HAGGARD, M.D.....North Fort Worth
Assistant Demonstrator of Histology, Pathology and Bacteriology.

GEORGE E. ADAMS, M.D.....Fifth and Lamar Streets
Lecturer and Demonstrator of Physiology.

HARVEY O. BRANNON, M.D.....113 West Hattie Street
Quiz Master on Obstetrics and Director of Woman's Home.

M. E. TADLOCK, M.D.....North Fort Worth
Assistant Demonstrator of Anatomy.

ROY F. SAUNDERS, M.D.....526 Henderson Street
Quiz Master in Surgery and Assistant Demonstrator of Anatomy.

ROBERT W. MOORE, Ph.B., M.D.....815 Lamar Street
Lecturer on Osteology and Assistant Demonstrator of Anatomy.

ALDEN COFFEY, M.D.....101 North Houston Street
Assistant Demonstrator of Anatomy.

H. L. WARWICK, M.D.....1302 Presidio
Assistant to the Chair of Nervous Diseases.

H. B. TRIGG, M.D.....1410 West Daggett Street
Assistant Demonstrator of Anatomy.

CHAS. W. DRAKE, Ph.B.....Fort Worth
Lecturer on Physics and Demonstrator of Chemistry.

GEORGE T. THOMAS.....Medical College
House Surgeon.

MISS ASHBROOKE.....506 Taylor Street
Clerk to the Dean.

OPENING EXERCISES.

Opening exercises for the fourteenth annual session of the Medical Department will be held in the auditorium of the new college building at 9 o'clock, Tuesday morning, October 1, 1907. The occasion has always been a pleasant one and every prospective student is urged to be present if possible. The regular lectures begin immediately after the close of these exercises.

Duration of Course.

The Medical Department is a member of the Association of Southern Medical Colleges and under its by-laws is compelled to give a four-year course of twenty-six weeks each. For many years this has been rigidly adhered to, but with the growth of medical science and with the gradual development of the plan of this faculty to raise the standard of its curriculum until it equaled the best of the heavily endowed schools of the East, it was found necessary last year *to extend the course to thirty-two weeks, and it will remain the same this year.* The gain to the student is almost incalculable, for not only does it afford opportunity for more detailed instruction in the branches then being taught, but it allows the introduction of many new ones and all this without any increase whatever in tuition or other fees.

New College Building.

It affords the Faculty unalloyed pleasure to announce the erection of a new college building which is the most commodious as well as the handsomest medical college in the South or West. It is located on the northeast corner of Fifth and Calhoun Streets and occupies a lot 100x100 feet. It is constructed of St. Louis grey pressed brick, buff terra cotta and stone trimmings and consists of a 9-foot basement and three other full stories. It is semi-fire-proof and cost a little over $50,000.

The first or basement floor contains a lobby for students 35x50 feet, lockers and lavatories, engine and coal room, rooms for nurses, housekeeping apartments for care-taker's family and four clinical wards, containing twenty-five beds, with necessary bathrooms, lavatories, etc.

The second floor is divided into the Faculty room, Dean's office, dispensary, house surgeon's office, two waiting-rooms, medical clinic, surgical clinic with anesthetic and preparation rooms, large halls, two bath rooms and five wards with an accommodation for twenty-five patients.

On the third floor are to be found the histological, pathological and bacteriological laboratories, two lecture-rooms and a large assembly hall, capable of seating 250 people, and a stage large enough for an additional fifty.

On the fourth floor are the chemical laboratory, with stock and lecturer room, the anatomical laboratory, with preparation room and a splendidly lighted small amphitheater for demonstrating prosections, besides two additional lecture rooms—making in all seven lecture rooms in the entire building.

It is needless to add that every modern convenience has been included in the erection of this beautiful structure. It is heated with hot water, scientifically ventilated, has spacious accommodations for students, comfortable quarters for the help required in caring for the building and for the trained nurses, needed in caring for the sick. The equipment in use in the various laboratories will be largely added to during the summer and at the opening of the term the Faculty confidently expects to present for the inspection of students and the general public *a model medical college building.*

CLINICAL RESOURCES.

The College Hospital.

The new college building contains fifty beds for private and charity patients, with a provision by which the number can be increased to 100. Most of this will be available for clinical instruction, and the walks through the wards every morning with the professor will be one of the most profitable features of the new life upon which the Department is entering. The student will find theory joined to practice here as he will find it in few other colleges outside of the very largest cities, and he will gain a practical familiarity with disease never before attainable in this institution. Under the new arrangement the Faculty expects to turn out graduates manyfold better qualified to practice medicine successfully than in any former period of the school's existence.

The College Clinics.

There are daily clinics in the two clinical amphitheaters on the first main floor of the college building, with steeply inclined seats for students which give close and uninterrupted view of all material exhibited. These clinics are open to all students, but, attendance is obligatory upon the two upper classes. Students, taken in rotation from the graduating class, will act as assistants to the professors and will get a personal familiarity with diagnosis and treatment of the sick not generally obtainable elsewhere. Fort Worth is growing rapidly and there is a large immigration of an element which is accustomed to seek medical advice in the clinic, and every year the outdoor clinic grows larger and better. As this is the only medical school in the city, there is *no division of either clinical or anatomical material*, a point which every discriminating student will see the advantage. All the city charitable cases are treated here.

St. Joseph's Infirmary.

This hospital is an imposing brick and stone structure, situated on the south side of the city and within easy reach of the college. Cars on Main Street pass every few minutes and convey the students direct to the Infirmary.

The main building has a capacity of 200 patients, with modern equipment for handling of private, railroad and city patients. A new wing has been recently completed which greatly increases the usefulness of this hospital to the school from a clinical standpoint. The addition makes it, perhaps, the lagest institution of the kind in the State. It is owned by the Sisters of the Incarnate Word, who have placed three excellent operating rooms at the disposal of the Faculty.

There is a second building with a capacity of fifty beds, including a modern hospital amphitheater especially designed for the purpose of clinical instruction, and is arranged in such a way that every student is able to observe, in detail, the work presented. It is in charge of physicians and surgeons connected with the Faculty.

Here are given weekly surgical clinics, illustrated by cases from the wards, and the most important operations in general surgery and gynecology are performed.

The Benevolent Home.

This institution is situated in the northeastern part of the city, easily accessible by the Samuels Avenue street cars. It provides an early home for orphans and homeless infants. The buildings accommodate seventy-five beds. The physician in charge is connected with the Faculty and constantly furnishes valuable clinical material in the study of diseases of children, diseases of the skin, etc.

The Delia Collins Rescue Home.

This institution is under the supervision of the Cumberland Presbyterian Church, and is situated on the South Side, near the Hospital. The Home has three main buildings, with a capacity of fifty beds, including a special building for obstetrical and surgical work. Opportunity is here offered for practice in obstetrical diagnosis and for acquiring practical experience by attendance upon cases of labor. The Home is in charge of the professor of obstetrics and his assistant. Students are arranged into small classes, and, in the past, each advanced student, during his medical course, has been afforded the opportunity of attending from ten to fifteen cases of labor. The great number of primiparæ in this institution, oftentimes necessitating the use of forceps in delivery, affords excellent opportunity to make a practical study of the mechanism of labor in all its details.

COURSES OF INSTRUCTION.

Students desiring special information concerning the details of any work in the four-year graded course should consult the regular Catalogue and Announcement of the medical department, or address Dr. Frank Gray, Dean of the Department. The entire course embraces nearly 4,000 instruction periods of one hour each. These hours are nearly evenly divided between the four classes and are made up of lectures, recitations, quizzes, demonstrations and laboratory work. Full information will be given on application to the Dean.

Requirements for Admission.

Every student who matriculates for his first course with the intention of applying for the degree of Doctor of Medicine must meet the following requirements: (1) He must present a certificate of

good moral character, signed by two responsible persons, one of whom must be a reputable member of the medical profession. (2) A certificate from the Committee on Entrance Examinations, appointed from the Faculty, showing fitness to begin the study of medicine. This examination will be held upon the following subjects: (1) English, (2) Mathematics, (3) United States and Texas History, (4) Geography, (5) Physics. A course in physics will be given and an examination held upon the subject at the end of the first semester. For more detailed information concerning the entrance examination apply to the Dean.

The entrance examinations will be held in the college building, the evenings of October 5th, 12th and 19th. Students who fail or are conditioned on these examinations are given an opportunity of bringing up such deficiency in the Preparatory Department of the University without extra expense. All entrance deficiencies must be removed before coming up for the final examinations of the first year.

Exemptions From Entrance Examination.

(1) Students who have taken a previous course in a recognized medical college.

(2) Holders of first-grade teachers' certificates, signed by a county superintendent of schools.

(3) Graduates of approved high schools and academies, normal, scientific and literary colleges.

Special Students.

Those matriculates who are not candidates for the degree of Doctor of Medicine are termed *special students* and are admitted to study after making satisfactory arrangements with the Dean.

All graduates of this school are invited to avail themselves of the privilege of the class rooms *without charge.*

Advanced Standing.

"The following classes of students may apply for advanced standing and obtain it, provided every applicant undergoes a satisfactory examination upon every branch below the class desired to be entered:

(a) Graduates of dentistry, of pharmacy and of veterinary medicine.

(b) Graduates and matriculates who have completed one or more courses in colleges of homeopathy and of electric medicine.

(c) Graduates of recognized colleges and universities who have completed therein prescribed courses in elementary branches of medicine, including chemistry and biology." Art. 4, Sec. 5, Southern Med. Col. Assn.

The foregoing applies only to students beginning the study of medicine.

Deficiencies.

A student who has failed in any subject will not be allowed to carry such deficiency beyond the year succeeding that in which the deficiency occurred. Arrangements must be made with the respective instructors for such re-examination. Grades made on such special examinations are not considered towards prizes.

Requirements for Graduation.

Every candidate for the degree of Doctor of Medicine must satisfy the following requirements: He must have attained the age of 21 years; possess a good moral character; have paid all fees in full; have attended four full courses of lectures in recognized colleges in four separate calendar years, the last of which must be in this school; have completed the required laboratory courses and have passed satisfactory examinations in all the branches embraced in the full four years' course of this institution. It is also required that a candidate for graduation shall be examined on all fourth year branches taught in this school irrespective of grades from other schools.

TUITION.

All tuition and fees must be paid in advance. All students will pay the same and share the same privileges. The expense of the four-year course is as follows:

Tuition, annually, including Matriculation Fee, Dissecting Ticket, Chemical and Pathological Laboratories.....$75.00
Graduation Fee 25.00

MEDICAL SOCIETY.

The Students' Medical Society meets every Saturday night. New students coming to the College will find it of advantage to join this society for its educational and social features. Its first meeting will be held October 12, 8 p. m., in the Auditorium.

PRIZES.

The Dr. W. P. Burts Scholarship.

The Faculty, in commemoration of the late Dr. W. P. Burts, formerly Professor of Obstetrics in this institution, offers to the regular first-year student passing the best final examinations in all branches of the first year, a free, non-transferable scholarship for the session following, the same to consist of tuition, exclusive of laboratory fees, and to be known as the Dr. W. P. Burts Scholarship. Awarded in 1905-6 to Mr. Edward Brannin, Cisco, Texas.

The Second Year Proficiency Prize.

The Faculty offers to the regular second year student passing the best final examination in all branches of the second year, medical books to the value of twenty-five dollars. Awarded in 1905-6 to Mr. T. Earle Fuller, New Boston, Texas.

Third Year Proficiency Prize.

The Faculty offers to the regular third-year student passing the best final examination in all branches of the third year a selection of medical books to the value of twenty-five dollars. Awarded in 1905-6 to Mr. Chas. I. Kopecky, Shiner, Texas.

The Faculty General Proficiency Gold Medal.

The Faculty presents to the member of the graduating class making the highest percentage during the full four-year graded course a gold medal, to be known as the Faculty General Proficiency Gold Medal. Awarded in 1905-6 to Mr. Robert W. Moore, Galveston, Texas.

This prize will not be awarded except to students who also take the degree "Cum Laude."

The Degree Cum Laude.

The degree of Doctor of Medicine, Cum Laude, is conferred upon students of marked ability and high moral character, who shall have made an average of 90 per cent. or more in the final examinations in all branches of the four years course in this institution. Awarded in 1905-6 to Mr. Robert W. Moore, Galveston, Texas.

HOSPITAL APPOINTMENTS.

From the graduating class each year an interne for St. Joseph's Infirmary, of Fort Worth, Texas, will be selected. Awarded in 1905-6 to Mr. Paul Francis Cope, M. D., Chicago, Ill.

Dr. W. G. Jamison, Chief Surgeon, offers an interneship in the International & Great Northern Railway Hospital, at Palestine, Texas, to the member of the Junior class selected by the Faculty as worthy to receive it. Awarded in 1905-6 to Mr. John W. Balke, Peters, Texas.

MISCELLANEOUS INFORMATION.

The new college building which is only two blocks from Main Street, is on the edge of a good residence district where board and rooms can be had at a reasonable price, varying from $12 to $16 per month.

Students with families who desire to do light house-keeping while here, are advised that houses rent at the rate of $3.00 to $4.00 per room per month owing to the neighborhood and character of house. Fort Worth is a very agreeable place to live in and, when practicable, students should bring their families with them.

A full line of text-books are kept for sale in the office of the Dean's clerk in the College Building.

Students on arriving in the city are requested to report promptly at the Dean's office at the college where every assistance will be rendered to get them comfortably located.

For any special information not furnished by the University Catalogue, or for the regular announcement of the Medical Department write to:

Professor of Physiology.

JOHN D. COVERT, M.D.....615 Calhoun Street.
Professor of Bacteriology.

J. B. McLEAN, M.D. .....1101 East Weatherford Street.
Lecturer on Hygiene.

ANNOUNCEMENT.

The success of the School of Pharmacy last session, the final announcement of which was made less than thirty days before the opening of the term, proved convincingly that the druggists of the State appreciate our efforts to establish a school where a thorough knowledge of the science and art of pharmacy may be obtained.

It indicates that the time is near at hand when the public, through the druggist, will demand experienced graduate pharmacists, and it is almost a certainty that a law will be enacted at the next session of the Texas Legislature making the possession of a diploma from some recognized School of Pharmacy and a certain number of years of practical experience in addition, essential to a license to practice pharmacy in the State of Texas. It is not the purpose of this school, however, to prepare students to take State Board examinations, although our course is so thorough as well as comprehensive that many students at the end of their Junior Year can readily pass any usual board examination.

It is the aim of the school to so fully prepare its students that they may practice their profession with such a knowledge of the science which governs the art that half the drudgery will be removed from the calling, and the same love for it may be developed as that which the physician feels for the one of his choice.

Pharmacy, too, is becoming more and more recognized as a science as well as an art, and it will become still more so the more enlightened its exponents become. The dispenser of drugs on prescription should never forget the responsible attitude he occupies toward the public and should conscientiously seek to bring to its service the most accurate knowledge and the most modern methods attainable. He should remember, too, that while much may be learned, as to results from actual experience in drug stores, that the great principles upon which these end-results depend, are never to be learned outside of a School of Pharmacy where the science as well as the art is carefully taught.

The course as given here is probably the best in the State. It is patterned after the best of the Eastern schools and has been considered by some even in advance of present requirements. Its thoroughness will be better appreciated by pharmacists who realize

the immense amount of knowledge which goes to make up the present day science. They know better than any others the vast literature of pharmacy and the enormous amount of special information required to fill acceptably positions in the varied fields into which the trained, cultivated pharmacist is called. The wholesale trade, the retail, the foreign and the pharmaceutical manufacturing, each require men of special knowledge, and this it is the object of this school to provide.

In conclusion, Prof. Gilmore, Dean of the Department, begs to tender sincere thanks to druggists of the State for the warm support always given to the school, and begs for its continuance. He would also like to suggest again that pharmacy is a branch which women can follow with profit to themselves and with satisfaction to those whom they serve. They are well adapted to the calling, and in the North and East many of them find lucrative positions as prescriptionists.

EQUIPMENT.

The College Building.—The College building is located at the corner of Fifth and Calhoun Streets, two blocks from the main business street, two blocks from the car line, and in close proximity to good boarding houses. It is a four-story brick structure, new and modern in every detail. The lecture rooms and laboratories are ample, well lighted and ventilated, and completely equipped for up-to-date pharmaceutical instruction.

Pharmaceutical Laboratory.—This laboratory is located on the fourth floor of the building. The room is furnished with an abundance of light, and is thoroughly equipped as a pharmacy laboratory. Each student will have a desk to himself, fitted with drawers and a locker, besides gas and water. Sinks have been so arranged as to be within easy access. The laboratory will accommodate about fifty students at one time, or about seventy, working in different sections.

Chemical Laboratory.—The Chemical Laboratory occupies a large room on the same floor. It is commodious, well lighted and equipped with desks, lockers and individual gas and water supply. In this laboratory instruction will be given in general and analytical Chemistry, Physics, Physiological Chemistry, Urinalysis and Toxicology.

Other Laboratories.—Laboratory instruction is also given in the various laboratories of the College in Physiology, Pharmacology, Bacteriology, Vegetable Histology and Microscopic Technique.

The Dispensary.

The Free Dispensary maintained by the Medical Department is under the direct supervision of the School of Pharmacy. All the prescriptions from the various clinicians of the College are dispensed by the students of the Senior class, under the direct supervision of the Dispensary Chief. This affords the exceptional opportunity of actual practice in prescription work unequaled by any school in the country.

COURSE OF STUDY.

The School of Pharmacy offers a two years' course of study leading to the degree of Graduate in Pharmacy. (Ph.G.)

The degree of Graduate in Pharmacy (Ph.G.) will be granted only to those students who have completed the course of instruction in this school and furnish evidence of having had two full years of practical experience in a drug store where prescriptions are regularly compounded.

To those students completing the course of instruction before having had two years' practical experience, a certificate will be given, which will be exchanged for a diploma when they furnish evidence of having had the required experience.

A diploma from this school will entitle the holder to register with State Boards of Pharmacy without examination, in all States except those which recognize *no diploma.*

Entrance Conditions.

Women are admitted to the course in pharmacy on the same terms and conditions as men.

Students will not be admitted under sixteen years of age.

Applicants must furnish evidence of a good common school education or pass a satisfactory examination.

Each applicant must present evidence of good moral character.

Applicants for advanced standing must comply with the conditions above and furnish evidence of having completed in some other school the courses for which they ask credit.

Special students, not candidates for a degree, will be admitted at the discretion of the Faculty.

Requirements for Graduation.

All candidates for the degree of Ph.G. must meet the following requirements:

1. Must possess a good moral character.
2. Must have attended two full courses of instruction in recognized colleges of pharmacy, the last of which must be in this school.
3. Must have completed the required laboratory courses and passed satisfactory examinations in all the branches embraced in the full course of instruction.
4. Must have paid all fees in full.
5. Must have had two years practical experience in a drug store where prescriptions are regularly compounded.

Fees.

Matriculation	$ 5 00
General Lecture and Laboratory Ticket:	
Junior Year	60 00
Senior Year	60 00
Graduation Fee	15 00

A deposit of $10.00 will be required to cover cost of drugs, chemicals and materials used in laboratory work.

For any special information not furnished by the University Catalogue or for the regular announcement of the Pharmacy Department write to:

MARQUIS E. GILMORE, Ph.C., M.D.,
North Fort Worth, Tex.

SCHOOL OF COMMERCE.

Faculty.

F. P. PREUITT,
Superintendent of Course of Instruction.

W. A. MIDDLETON,
Instructor in Bookkeeping, Commercial Law, etc.

R. L. MILLER,
Instructor in Penmanship.

EARL WILKES,
Instructor in Shorthand and English.

MRS. R. L. FRYE,
Teacher in Typewriting and Spelling.

Business Course of Study.

The course of study in the different departments is practical and complete. The business experience of the able corps of teachers, together with the best thought and experience of some of the best talent in the State, has been brought together to arrange a course of business that would insure for the student the most practical and complete course of instruction to be had.

The student here is taught business by actually doing business, not as it is done in other schools, but as it is done in retail and wholesale houses, banks, railroad and law offices.

Every transaction is real, the student buying and selling, depositing and drawing from the bank; buying money orders and shipping and receiving goods to be sold on commission, discounting his notes and drafts; in fact, he becomes a clerk and bookkeeper at once, and in this manner receives an experience equal to several years' work in a business house.

Bookkeeping.

This study receives the degree of attention its importance demands. A great variety of systems of accounting are taught, and the adaptability of each to some particular business carefully explained, the aim being to furnish a practical form for almost every kind of business.

Penmanship.

The college has always had one or more of America's best penmen as instructors, and this accounts for the large number of fine penmen that leave this school. The purely muscular writing is taught, and our students not only soon learn to write accurately, but rapidly, just what is demanded by business.

Arithmetic.

This is most generally neglected in business schools, but it is a serious mistake, as a knowledge of bookkeeping without ability to figure accurately and rapidly all kinds of business calculations is of little value.

An expert of twenty years' experience in rapid calculation instructs in this department, and no student ever graduates without the ability to handle figures correctly and rapidly.

Spelling.

So much neglect is shown in this branch in public and private schools that we find it necessary to drill the students in all departments daily. No one is ever excused, and all are required to pass an examination in spelling before a certificate of graduation is issued.

Correspondence.

To be able to write a letter of business or friendship in proper form is a valuable accomplishment and is indispensable in business. The latest form in business letter-writing is taught, and every student is expected to be proficient in this art.

Phonography and Typewriting Course.

There has always been a demand for shorthand writers, but within the past few years it has increased wonderfully. This is largely due to the invention of the typewriting machine and the consequent demand for amanuensis work in professional and mercantile offices. We believe that every student in this department who has acquired proficiency in this art has succeeded in obtaining a position if he or she desired one. The ability to write the exact words of the most fluent speaker is an accomplishment that will be

a source of pleasure through life, even though the possessor does not use it as a means to obtain a livelihood. To any young man or woman proposing to keep books, or to do other office work, a knowledge of shorthand and typewriting will be of the greatest use, adding largely to his or her availability and chance of securing profitable employment, because at the present time so much office work is done by the writing machine.

We teach the Pitman-Graham system of shorthand. This system is standard, and capable of being written fast enough to take down the exact words of the most rapid speakers.

In learing to use the writing machine we furnish the standard typewriters.

A first-class stenographer can always obtain a position in an office if he can help keep the books; and a knowledge of bookkeeping has often helped a young stenographer to a promotion.

In working out our idea of what a business college ought to be, many new methods have been introduced, which we shall be glad to explain more fully to anyone wishing further information, but which can hardly be fully appreciated without personally visiting the college.

Rates of Tuition.

Business Course.

Scholarship good for tuition in bookkeeping, business arithmetic, correspondence, business forms, commercial law, penmanship, rapid calculation, spelling, business practice, political economy—scholarship good to complete the Business Course, without regard to the time it may take, day and evening $50.00
Scholarship good for three months (twelve weeks) 25.00
Scholarship good for one month (four weeks) 10.00

Penmanship Course.

Full course, plain and ornamental, without regard to time.... $40.00
Plain penmanship, per month, day session 5.00
Ornamental penmanship, per month, day and evening 10.00

Shorthand and Typewriting Course.

Scholarship, time unlimited, Pitman-Graham system $50.00
Tuition, three months 25.00
Tuition, one month 10.00

Board.

This is an important item and is carefully provided for. The students of the Business College, if desired, have all the advantages of the boarding department provided for the other schools of the University. The location of the dormitories and dining-hall is in the beautiful ten-acre Campus on the South Side in a choice residence portion of the city.

It is easily accessible by the street-cars and is in pleasant walking distance of the Business Department.

Here they are admitted to the fine libraries and reading-rooms, to public lectures and debates, and to many other privileges if entertainment and instruction. They are furnished with pleasant rooms and good board, sitting at tables with the President and preceptress and many other members of the Faculties of the University, from whom they receive intelligent, kindly care and supervision. Their stay among us will tend to the development of the character of the real lady and gentleman. Considerate parents can safely trust their children and young people to our guiding care.

For further information address,

F. P. PREUITT,
Business School, F. W. U.,
Fort Worth, Texas.
